LISTING OF THE CLAIMS

Claims 1-7 (Canceled)

8. (previously presented) A data processing system comprising:

a display with a graphical user interface (GUI) for enabling user interaction with a plurality of menu options; and

an adapter for automatically and dynamically arranging the menu options in the GUI to reduce user-navigation among the options,

wherein

the adapter is capable of respective arrangements of the menu options for respective individual ones of multiple users,

the GUI comprises a user identity selector for enabling the adapter to discriminate between the multiple users, and

the user identity selector comprises respective user-selectable representations for respective ones of the multiple users in a predetermined location on the display.

9. (previously presented) A data processing system comprising:

a display with a graphical user interface (GUI) for enabling user interaction with a plurality of menu options; and

an adapter for automatically and dynamically arranging the menu options in the GUI to reduce user-navigation among the options,

wherein

the GUI comprises multiple pages,

the adapter dynamically arranges specific ones of the menu options to particular ones of the multiple pages, and

the adapter allocates first and second ones of the menu options as a group to a single one of the multiple pages.
